**Installation Date:**

### About the Project

The Anytime, Anywhere Learning project is a professional development pilot project for select Miami-Dade County Public schools. Once configured by the Apple installation team, the iPods will be loaded with professional development content (5-10) minutes and can be 'checked out' by teachers to view the podcasts at their convenience. Additional content will be automatically downloaded through iTunes and synced to the iPods when it becomes available. The project's goal is to create over 180 podcasts, starring M-DCPS' best teachers and administrators.

### Equipment

The following equipment has been delivered and set up at your school to support this project.

Quantity	Description
40	iPod Touch
2	MacBooks
1	PowerSync Cart
2	Ethernet cables
2	Mini-DVI to VGA adapter (for connection to a projector

The iPod cart will be locked by the installation team. Your lock combination is \_\_\_\_\_.

### Maintaining the iPod Content

To ensure that content on the iPods is up to date, the MacBooks must occasionally download content from iTunes and be synced with the iPods in the PowerSync cart.

- 1) Take MacBook 01 out of the cart and plug it in to power if there is not a sufficient battery charge. The power adapters should be found in the cart with the MacBooks.
- 2) Plug an Ethernet cable (also in the cart) into an active network jack and into the MacBook's Ethernet port to ensure a network connection.
- 3) Log in to the computer using the following credentials:
  - a) username: ipodsync
  - b) password: ipodsync1
- 4) Open iTunes by clicking on the icon in the dock, which can be found at the bottom of the screen. iTunes will automatically begin downloading new podcasts.
- 5) Once iTunes has downloaded the new podcasts, plug the top drawer of the iPod cart into the MacBook's USB port. The iPod cart USB cables can be found on the back of the cart – the top cable connects to the top drawer of iPods and the bottom cable connects to the bottom drawer. Note that you will need to close the cart's roll-top drawer in order to access these cables.
- 6) Ensure that all 20 iPods appear in iTunes and sync the new content.
- 7) Repeat with MacBook 02 and the bottom drawer of the cart.

Note: Do not attempt to sync both drawers with the same MacBook. Using a MacBook other than the one configured with the devices will require you to reconfigure the iPods.

### Support

For hardware or software support, please call 800-919-2775 and enter account number 46373. You will need the computer's serial number, which can either be found under the battery, or clicking on the Apple icon in the upper left-hand corner, selecting *About this Mac* and clicking on the version number twice. For a more detailed description of the support process, please see the following flow chart.

For additional help with the Anytime, Anywhere project, please email [AnytimeAnywhere@group.apple.com](mailto:AnytimeAnywhere@group.apple.com).
